

**Federal Communications Commission Rural Health Care Pilot Program
Wyoming Network for Telehealth (WyNETTE) Quarterly Data Report
26 April 2012**

1. Project Contact and Coordination Information

a. Identify the project leader(s) and respective business affiliations.

Dr. Rex Gantenbein, University of Wyoming (Associate Project Coordinator)
Larry Biggio, Wyoming Health Information Organization

b. Provide a complete address for postal delivery and the telephone, fax, and e-mail address for the responsible administrative official.

Dr. Dorothy C. Yates, Associate VP for Research and Economic Development
University of Wyoming
1000 E. University Avenue, Department 3355
Laramie WY 82071
Telephone: 307.766.5320
Fax: 307.766.2608
E-mail: dyates4@uwyo.edu

c. Identify the organization that is legally and financially responsible for the conduct of activities supported by the award.

University of Wyoming

d. Explain how project is being coordinated throughout the state or region.

A consortium of state agencies, private health organization and professional and community organizations exists to coordinate the network development with other telehealth-related activities in Wyoming. Members were appointed by the Director of the Wyoming Department of Health. The group meets monthly, and reports on this project are given at each meeting. In lieu of developing a separate advisory committee, the consortium has assumed the responsibility of developing the governance and financial structure for the network in cooperation with the University.

Project and fiscal management has been provided by staff at the University of Wyoming, through funding from a HRSA ORHP Rural Health Care Network Development grant. This grant ended in April 2011; however, funding from a HRSA Office of Health Information Technology grant was used to continue support for a skeleton staff, consisting of the project manager and a technician. The project manager has resigned to take another position and the technician is on leave until August 2012. No staff other than the PI remain to manage the project.

2. Identify all health care facilities included in the network.

A list of facilities in the state participating in the project is provided in Attachment A. Several sites, as shown in the attachment, have voluntarily withdrawn from the project, as they found the network underutilized and/or insufficient for their connectivity needs.

3. Network Narrative.

a. Brief description of the backbone network of the dedicated health care network

The network, as implemented, consists of an ATM-based "cloud" through which all participating sites will be connected. The selected vendor is providing the equipment, lines, and management of the network as part of their contract.

**Federal Communications Commission Rural Health Care Pilot Program
Wyoming Network for Telehealth (WyNETTE) Quarterly Data Report
26 April 2012**

b. Explanation of how health care provider sites will connect to (or access) the network, including the access technologies/services and transmission speeds

Hospitals with more than 25 beds were connected with dual T1 connections; all other sites were connected with single T1 connections. All sites were provided with routers to connect to the network as part of the project.

c. Explanation of how and where the network will connect to a national backbone such as NLR or Internet2

A collection point was established at the Division of Information Technology at the University of Wyoming as part of the project. The University has a redundant connection to Internet2 via the Front Range Gigapop that has been available to the sites.

d. Number of miles of fiber construction, and whether the fiber is buried or aerial

No fiber was installed as part of this project. All connections used existing copper wire.

e. Special systems or services for network management or maintenance (if applicable) and where such systems reside or are based

All network services and maintenance are being managed by the vendor.

4. List of Connected Health Care Providers.

See Appendix A. The network is being used for a small number of healthcare operations (see item 10 below).

5. Identify the following non-recurring and recurring costs, where applicable, shown both as budgeted and actually incurred for the applicable quarter and funding year to-date.

An invoice was paid by USAC in January in the amount of \$435,642.99 to cover recurring and non-recurring charges through August 2011. Three line items in the original invoice were not allowed due to inconsistencies with the documented costs. A new invoice in the amount of \$15,286.44 was sent to the vendor in March 2012 to cover these three items. To date, the invoice has not been submitted by the vendor to USAC.

The matching funds paid to the vendor total \$70,405.44. This represents a shortfall of \$9,170.34 for the two invoices submitted. No invoice has been submitted by the vendor for the remaining matching funds.

RHCPP management has required that the NCW be revised before additional invoices could be processed. We have requested support from USAC to review and revise the NCW but have not yet had a response from our USAC representative.

6. Describe how costs have been apportioned and the sources of the funds to pay them.

a. Explain how costs are identified, allocated among, and apportioned to both eligible and ineligible network participants.

Costs were specified in the vendor contract. The contract indicates that costs will be distributed equally among the participants that receive the same services (T1 or dual T1 connectivity). The actual costs as invoiced in November vary widely depending on the service provider and the location, but the total costs thus far

**Federal Communications Commission Rural Health Care Pilot Program
Wyoming Network for Telehealth (WyNETTE) Quarterly Data Report
26 April 2012**

are less than the contracted amount for both the non-recurring and recurring costs.

b. Describe the source of funds from eligible and non-eligible participants.

The community mental health/substance abuse centers in the state participating in the project have pledged \$22,380 in matching funds to the project. The pledge will be divided equally among these sites once the existing matching funds are completely expended.

c. Show contributions from all other sources.

The project has received \$115,000 in matching funds from the Wyoming Department of Health through its Division of Emergency Preparedness (\$100,000) and the State Office of Rural Health (\$15,000). Funding from the latter account has been fully expended, but a balance remains in the former. This account will be used to match invoiced costs until it is expended. Given the reduced number of participating sites, we estimate that to occur sometime early in 2013.

d. Explain how the selected participant's minimum 15 percent contribution is helping to achieve both the selected participant's identified goals and objectives and the overarching goals of the Pilot Program.

The matching funds demonstrate a commitment to developing telehealth capacity in Wyoming from both the State and private healthcare providers. Such commitment is necessary to ensure its adoption and sustainability.

7. Identify any technical or non-technical requirements or procedures necessary for ineligible entities to connect to the participant's network.

No ineligible entities are currently participating.

8. Provide an update on the project management plan, detailing:

a. The project's current leadership and management structure and any changes to the management structure since the last data report.

The lead contact for the vendor retired in December 2012. Her duties have been assigned to another employee of the vendor, but this individual does not respond to communication or requests. A conference call was held in January to acquaint him with the project, but since then we have received little or no response to emails or phone calls.

b. The project schedule.

We will continue invoicing for the remaining sites until the allocated funds have been expended.

TASK	DEADLINE
Complete network design	29 August 2008 (completed)
Collect Letters of Agency	30 October 2008 (completed)
Submit Form 465 for informal review	15 November 2008 (completed)
Revise Form 465 and submit	10 April 2009 (completed)
Review responses to Form 465	10 June 2009 (completed)
Execute vendor contract	15 March 2010 (completed)

**Federal Communications Commission Rural Health Care Pilot Program
Wyoming Network for Telehealth (WyNETTE) Quarterly Data Report
26 April 2012**

Submit Form 466A	30 May 2010 (completed)
Deploy network	30 November 2010 (completed)
Submit Form 467/SAL received	9 November 2010 (completed)
Begin invoicing	15 November 2011 (completed)

9. Provide detail on whether network is or will become self-sustaining. Selected participants should provide an explanation of how the network is self-sustaining.

A formal sustainability plan was submitted as part of the Form 466A process. It was accepted by the FCC prior to the issue of the Funding Commitment letter. A copy of this plan was previously provided and has not changed.

As noted in the previous report, all hospitals and primary clinics initially connected to the network have requested to be disconnected from the network. This was accomplished in January 2012. The state telehealth consortium is currently working with these sites to transfer them to the regular Rural Health Care program. With the loss of these sites from the network, we are working with the remaining sites (largely mental health and substance abuse centers) and the vendor to make changes to the network that will lead to sustainability.

10. Provide detail on how the supported network has advanced telemedicine benefits.

The remaining sites in the network are using the connections to provide mental and behavioral health services to distant sites. Many of the sites that have discontinued participation are also providing primary and specialty care to other locations through alternative communication mechanisms.

11. Provide detail on how the supported network has complied with HHS health IT initiatives.

The network has not addressed these initiatives.

12. Explain how the selected participants coordinated in the use of their health care networks with the Department of Health and Human Services (HHS) and, in particular, with its Centers for Disease Control and Prevention (CDC) in instances of national, regional, or local public health emergencies (e.g., pandemics, bioterrorism). In such instances, where feasible, explain how selected participants provided access to their supported networks to HHS, including CDC, and other public health officials.

At this time, this coordination has not taken place.
